

A Peek Into Our Classroom

Zimmer Preschool

There is a lot to see and do outdoors.

One day while outdoors, we discovered many colorful leaves on the ground. Where we were standing we looked up and saw a tree full of colorful leaves. We pointed to the leaves on the tree and the leaves that were on the ground.

We are starting to make connections.

We then brought the leaves into our classroom so we can play with them and look at them more closely.

We love playing with the water at our water table.

But this time it was extra fun.

We turned our water into blue water and saw how it can look different but it is still the same feel and fun as water. We added soap to the water and had a good time playing in the blue and bubbly water.

There is endless space when drawing on the chalkboard outside.

Here we can draw as large as we like and not worry about going off the paper and drawing on the table.
